Personal website: <https://dzienko.dev>

Summary

High-impact Frontend Leader with **12+ years of experience** in architecting complex web ecosystems (**React, Next.js, micro frontends**). Pioneer in **AI-assisted development** workflows, significantly accelerating delivery cycles. Proven track record in **scaling engineering teams** and **building technical communities**. Co-creator of popular tech media (YouTube) and **speaker at major conferences** like JS Poland.

Experience

Lead Frontend Developer, Oct 2025 - Mar 2026

Playsmart.io (iGaming)

- Architected and delivered **two high-performance iGaming platforms** (spinni.com, pelaanyt.com) for the Nordic markets using a modern tech stack.
- **Pioneered AI-native development workflows** (utilizing Cursor IDE, CodeRabbit, and Anthropic Sonnet and Opus models), resulting in a **100% increase in feature delivery speed**.
- **Led and mentored a team of engineers**, ensuring high code quality through **rigorous code reviews** and architectural guidance.
- **Optimized UI rendering performance**, significantly improving **Core Web Vitals** and user retention metrics.

Technologies: Next.js (React with Typescript), Redux, Tailwind CSS, Cursor IDE (Sonnet, Codex), Jenkins, GitHub Actions, DataDog

Developer Advocate, Jul 2025 - Oct 2025

Tolgee.io (open-source localization platform)

- Transformed community engagement by **migrating the developer support ecosystem from Slack to Discord**, fostering a more interactive contributor environment.
- **Redesigned and re-authored comprehensive developer documentation** and SDK guides (iOS/Android), **reducing support tickets by 60%**.
- Acted as a technical **bridge between the community and the core product team**, translating user feedback into actionable product features.

Technologies: Next.js, React, JavaScript, TypeScript, Redux, Tailwind CSS, Technical writing (Docusaurus), Monitoring (Sentry.io)

Senior Frontend Developer, Feb 2025 - Jun 2025

Leocode (SaaS)

- Engineered **complex back-office interfaces and multi-step data workflows** for a **Web3 digital identity** solution (client: Hashgraph Group) using React, Next.js, and TypeScript.
- **Architected a scalable library of reusable UI components** and internal administrative tools, streamlining identity management processes within a blockchain ecosystem.

Technologies: Next.js, React, JavaScript, TypeScript, Zustand, Tailwind CSS, Sentry

Senior Frontend Developer, May 2024 - Jul 2024

AirHelp (SaaS)

- **Implemented RTL/LTR-compatible UI components**, including support for **Arabic localization** and layout handling
- Developed **new authentication and login flows** and contributed to CRM integration efforts across the platform

Technologies: Next.js, React, JavaScript, TypeScript, Storyblok, Tailwind CSS, Sentry, AWS (Amazon Web Services)

Senior Frontend Developer, Nov 2023 - Jan 2024

STÖK (e-commerce)

- **Developed and launched a high-performance digital storefront** for a major Nordic fashion brand (Moods of Norway, moods.no) **leveraging Next.js, Centra e-commerce engine, and Storyblok headless CMS.**
- Optimized frontend architecture for scalability, SEO, and **Core Web Vitals**, ensuring a seamless and high-converting user experience across all devices.
- **Integrated CMS-driven content workflows**, enabling cross-functional marketing teams to independently manage and deploy campaigns rapidly.

Technologies: React, JavaScript, TypeScript, Storyblok, Next.js, CMS, Centra, Core Web Vitals, Google Analytics, SEO

Senior Frontend Developer, Apr 2022 - Sep 2023

Teckro (medical SaaS platform)

- Spearheaded the frontend development of a **mission-critical medical SaaS platform** utilized by top-tier global pharmaceutical corporations, **heavily utilizing a microfrontend architecture (Single-Spa).**
- **Designed and integrated secure authentication flows (custom Teckro SSO)** and expanded the platform's global reach by engineering robust i18n/localization solutions.
- **Streamlined CI/CD pipelines and CI/CD workflows**, significantly reducing time-to-market for new feature rollouts and enhancements.
- **Enhanced the PSPDFKit integration**, extending document management and digitalization platform functionality

Technologies: React, JavaScript, TypeScript, Single-Spa, micro-frontend, translations, i18n, Docker, Jenkins, PDF manipulation, PSPDFKit

Frontend Chapter Lead, Jul 2019 - Apr 2022

Vodeno (Fintech Banking application)

- **Directed a frontend organization of 15+ engineers** across multiple **Spotify-style product teams**, serving as the primary technical point of contact.
- **Engineered core digital banking** products for Aion Bank utilizing React, Redux, and a scalable micro-frontend architecture.
- **Architected and developed highly secure ETF investment and savings applications** for a modern mobile banking platform.
- Spearheaded the **technical recruitment pipeline** and **streamlined the onboarding process** for new frontend developers.
- **Established and facilitated weekly Frontend Chapter meetings**, fostering an engineering culture of knowledge sharing, technical alignment, and continuous learning.
- Bridged communication and collaboration **across cross-functional teams** operating in a complex, cloud-native fintech environment.
- Played an instrumental role in **scaling the frontend division**, actively shaping technical decision-making and driving hiring initiatives.

Technologies: React, JavaScript, TypeScript, Single-Spa, micro-frontend, CSS in JS, Styled Components, Storybook, Redux, Webpack, SCSS, Figma, RxJS, Docker, Terraform, CrowdIn, i18n, Google Cloud

Front-end Developer, May 2018 - Jul 2019

Daftcode (RestaurantWeek, internal product development for startups)

- Worked on **internal product development**, including real-time collaboration features and **WebSocket-based application workflows**
- **Built recruitment and marketing websites for startup** and technology-focused initiatives within the Daftcode ecosystem
- Implemented majority of **RestaurantWeek** components on frontend and backoffice
- Collaborated **closely with experienced senior engineers** in a fast-paced startup environment, contributing to front-end architecture and application development
- **Delivered an introductory CSS workshop as part of the Daft Academy** educational initiative for beginner developers

Technologies: React, JavaScript, TypeScript, React Native, Expo, Styled Components, CSS in JS, WebSockets, Figma, SEO

Front-end Developer, Aug 2016 - Jul 2017

GogoApps (SaaS)

- **Developed web applications using React and MobX** for state management and frontend application architecture
- Built and customized **WordPress themes using Timber and Twig** to improve flexibility, maintainability, and performance
- **Worked on SaaS-oriented frontend solutions** and responsive user interfaces across multiple client and internal projects

Technologies: React, JavaScript, TypeScript, MobX, Styled Components, CSS in JS, WebSockets, Figma, SEO, WordPress

Front-end Developer, Nov 2016 - Jun 2017

Functionate

- Contributed to the development of Kodu.je, an e-learning platform focused on teaching frontend and JavaScript best practices to beginner developers in the Polish community
- Created educational frontend content and platform features using vanilla JavaScript, HTML, and CSS
- Worked on improving accessibility and inclusivity through custom subtitles and multilingual educational materials
- Became actively involved in the frontend community ecosystem through meetups and knowledge-sharing initiatives, which later led to **long-term involvement with meet.js in Warsaw**

Technologies: React, JavaScript, Styled Components, Figma, SEO, Video editor

Editor in Chief, Jun 2013 - Jun 2016

Student Internet Television TVPW

Lead an organization with 80 employees, holding weekly TVPW Board meetings, overseeing projects, securing partnerships, and representing TVPW at conferences.

Analyst, May 2015 - Jul 2015

Capitalia sp. z o.o. Sp. K.

Contributed to a public-sector digitalization project commissioned by the Polish Center for Digital Poland Projects focused on standardization and long-term development of e-government services.

Education

Master of Engineering, 2017 - 2019

Polish-Japanese Academy of Information Technology, Warsaw

Bachelor of Engineering, 2012 - 2016

Warsaw University of Technology, Warsaw

Skills

Core Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Micro-frontends (single-spa), Frontend Architecture, Performance Optimization (Core Web Vitals), Accessibility (a11y), Localization/i18n, Storybook.

State & Data Management: Zustand, Redux Toolkit, MobX, REST API, GraphQL.

Styling & UI: Tailwind CSS, Styled Components, CSS-in-JS, Responsive UI.

AI Engineering & Tooling: AI-Assisted Development (Cursor, Windsurf), OpenAI & Anthropic APIs, Prompt Engineering, Agentic Workflows.

Backend & Cloud: Node.js, Express, NestJS, AWS, Google Cloud, Docker, Jenkins, GitHub Actions.

E-commerce & CMS: Storyblok, Centra, WordPress.

Leadership & Community: Engineering Leadership, DevRel / Developer Advocacy, Tech Recruitment & Onboarding, Public Speaking, Agile/Scrum.

Languages

- Polish - Native
- English - C1

Certifications and Licenses

- AI_Devs (2, 3, 4 editions)
- Snowflake: Building Intelligent Data Apps with Snowflake

Achievements

Speaker at JS Poland: Delivered a high-impact talk on "Microfrontends in mobile" and participated in expert panels with industry leaders (e.g., Luca Mezzalana).

YouTube Creator: Co-creator of "WebPrasówka" and "Web Nowinki" – leading Polish tech channels focusing on frontend trends and industry news.

Mentoring & Ambassadorship: Official Ambassador for Windsurf IDE in Poland; mentored dozens of developers through community initiatives.

TVPW Leadership: Managed a 80- member student media organization, overseeing multi-channel content production and team operations.
